PROFILE

Final-year B.Tech IT student with a strong interest in Data Science, Data Analytics, and Business Analysis. Proficient in Python and its key libraries, Statistics, SQL, Power BI, Tableau, and Microsoft Excel, with a growing foundation in Machine Learning. Demonstrated ability to build dashboards that enhanced decision-making efficiency and generated business value.

EDUCATION

University Of Mumbai- Pillai College of Engineering, Navi Mumbai

Aug 2022 – May 2026

B Tech- Information Technology

SKILLS & TOOLS

- Programming:** Python, R, Java, C, SQL
- Libraries & Frameworks:** Pandas, NumPy, Matplotlib, Seaborn, TensorFlow, OpenCV
- BI & Data Tools:** Power BI, Excel (Pivot, Power Query), Tableau, Jupyter Notebook
- Databases:** MySQL, PostgreSQL, SQLite
- Concepts:** Data Cleaning, Visualisation, EDA, Machine Learning (Basic), AI Automation
- Other Tools:** Git, GitHub, VS Code, Flask, HTML, CSS, JS.

EXPERIENCE

Data Analytics Intern – Cloud Counselage Pvt. Ltd.

Jan 2025 – Mar 2025

- Completed a 240+ hour internship focused on industry-specific training and data analytics project execution.
- Delivered project outcomes using structured problem-solving and best practices in project management.
- Demonstrated research abilities, domain knowledge, and ethical conduct while working with minimal supervision.

COURSE & CERTIFICATION

- | | |
|---|---|
| Python Foundation Certification – Infosys (June 2025) | Data Analyst Job Simulation – Accenture(July 29th, 2024) |
| Data Analytics Essentials – Cisco (February 2025) | Introduction to Generative Ai – Google (September 8 th 2024) |
| Power BI for Business Professionals – Infosys (August 2024) | Introduction to LLM – Google (September 8th 2024) |

PROJECT

AgroAI Assist – AI-Powered Plant Disease Detection (B. Tech Major Project – Ongoing)

- Developed a web-based AI system using **CNN** to Detect potato leaf diseases with **85%+ accuracy**, processing **3000+ images** with **OpenCV**, and predicted Plant health from leaf images to provide actionable, data-driven recommendations for better crop yield.
- Incorporated **Real-time weather alerts and a chatbot API** handling **100+ queries/day**, and **Designed an E-commerce platform** enabling farmers to purchase **50+ fertilisers and pesticides** directly based on AI diagnosis, bridging the gap between detection and treatment
- Built interactive dashboards and reporting tools using Data Analytics, tracking plant health trends, predicted soil conditions, and disease prevalence across, supporting sustainable, data-driven agricultural decisions.

Diwali Sales Analysis using Python, Pandas, NumPy, Matplotlib, Seaborn (Personal Project)

- Conducted an in-depth Exploratory Analysis of sales data to identify **consumer behaviour patterns, seasonal trends, and product performance insights**. Leveraging Python libraries such as **Pandas, NumPy, Matplotlib, and Seaborn**.
- Transformed raw datasets into meaningful visualisations that highlighted key sales drivers.
- These interactive dashboards not only simplified complex data but also improved **decision-making** efficiency by nearly **15%**, enabling more accurate business forecasting and strategic planning.

Madhav Ecommerce Sales Dashboard using Microsoft Power BI (Personal Project)

- Designed and deployed an interactive Microsoft Power BI dashboard to **Analyse E-commerce sales data**.
- Focusing on state-wise performance and top-selling product categories. The dashboard generated actionable insights that contributed to a **12% increase in monthly sales** by streamlining and optimising the sales process.
- Additionally, the use of dynamic and interactive visuals **enhanced reporting speed by 30%**, enabling faster effective decision-making.
